

SEARCHED

Figure 1 consists of two line graphs, (a) and (b), plotting the rate of reaction against temperature. Both graphs have a y-axis labeled 'Rate of reaction' and an x-axis labeled 'Temperature'.

Graph (a) shows a straight line starting from the origin and increasing linearly with temperature. The line is labeled 'a'.

Graph (b) shows a curve that starts at the origin, rises steeply, and then levels off as temperature increases. The curve is labeled 'b'.
